

BUTTON SPINNERS

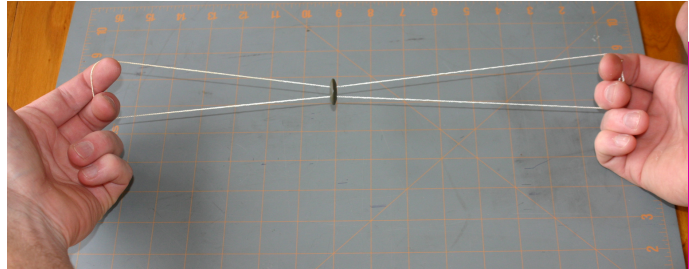

MUSEUM MASHUP

1. Thread your elastic through one of the holes on the button
2. Thread your elastic through hole opposite the first piece
3. Tie the two loose ends together
4. Your button spinner should look like this:

Hook your fingers through the two ends, hold it pretty tight, and then spin the string.

After it has spun several times, start moving both hands out and in to make the button begin to spin.
